

Cooperative/Service Center Pricing

Thank you for your interest in Ten Sigma Transition resources. In order to help cooperatives/regional service center and their member districts to utilize our resources, we offer special discount pricing. Below you will see a list of Transition products along with the retail, member district, and cooperative/regional service center pricing discounts.

Member district pricing is the price your member districts will pay when they order a product(s) directly through their district. Cooperative pricing is the price the cooperative pays which allows the cooperative to either pass the savings along to their member districts or keep the difference to pay for administrative costs.

	Retail Price	Member District Price	Cooperative Price
